Mobius Innovation & Development Purchases Collaboration Tool to Improve Communication with its Customers.

Viera, FL. (August 21, 2006) – Mobius Innovation & Development, Inc., a leader in CAD consultation has announced its purchase of GoToMeeting™ collaboration software.

“It is important as a consulting firm with customers located in disperse locations to leverage the best technology to support them. We selected GoTo Meeting™ after an excellent experience with a client of ours. It enabled us to demonstrate the progress on the project from our location to theirs (Florida to Minnesota). The best thing was we could perform ad-hock meetings or formal ones, illustrating CAD in real time or just to go over some of the project spreadsheets. Anything that aids in communication is a huge plus” said Tim McLellan, President, for Mobius Innovation & Development.

Mobius Innovation & Development, Inc. plans to leverage this technology as required on future projects.

###
