Mobius Innovation & Development Incorporates

Rockledge, FL. (September 22, 2005) – Mobius Innovation & Development, Inc., a leader in CAD consultation has announced its incorporation as of September 22, 2005.

“I am very, very excited to personally begin the next journey in improving the use of CAD related technology for everyone,” said Tim McLellan, President, for Mobius Innovation & Development. “It amazes me that in today’s highly skilled and technical world that CAD is still viewed as drafting in many areas. This view affects the bottom line in many ways. Probably the most important is the ability for companies to innovate, change designs, and get to market. The only way companies will truly achieve their goals is if they deploy reusable, robust, and strategic CAD techniques and Mobius Innovation & Development can help.”

The firm offers services including mechanical design, solid modeling methodology, and consulting in areas around CAD and PLM.

###
