Mobius Innovation & Development, Inc. teams up with Dacha Works, LLC to design and engineer the world's first SmartCase for the iPhone™

Viera, FL. (February 22, 2010) – Mobius Innovation & Development, Inc., a leader in CAD consultation in Defense, Aerospace, and Consumer Products is proud to have teamed up with Dacha Works, LLC to produce the world's first SmartCase for the iPhone™.

The project was the brain child of Colin Montgomery, Businessman, Artist, and Entrepreneur in New York City. One of his many goals was to build an iPhone™ case that was thin, protective, and extremely ergonomic. Thus, the Dacha Works, LLC, **Module** was born. Colin explains, "the patent pending **LeveRidge** is the most handy (feature)... it gives your fingers a continuous groove to use as a resting point. Less gripping, and more letting our friend gravity do all the work. The case just rests in your fingers." Colin went on to say "Dacha Works, LLC, is proud to work with Mobius Innovation & Development, Inc. and the final styling was similar to a fine automobile."

"From a design and engineering perspective it was just plain fun! We had the opportunity to go through a number of design iterations for styling, prototyping and production in a very short period of time. Our first prototype run had an amazing fit with the phone. Last but not least we were able to quickly produce high quality product renderings to assist Dacha Works with marketing this great product." said Tim McLellan, Mobius Innovation & Development, Inc. President.
